SKILLS

Hard skills

- Java, Python, C++, Go.
- SQL, NoSQL.
- Git, GitHub, Jira.
- Agile methodologies.
- Automation
- Machine Learning.

Soft skills

- Leadership and teamwork.
- Problem solving.
- Adaptability and continuous learning.
- Analytical thinking.

Languages

- Spanish: Native
- English: Advanced

PROFILE

Senior Systems Engineering student (70% of degree completed) specializing in Backend development (Java, Python, Go and C++) and API design. Experienced in SQL/NoSQL databases and Agile methodologies.

Looking to leverage technical skills in an entry-level Software Engineer or Backend Developer role.

EDUCATION

Systems Engineering 2021 - Present

Universidad Nacional del Centro de la Provincia de Buenos Aires (UNICEN)
Tandil, Provincia de Buenos Aires.

GPA: 7,53/10 - 70% of degree completed

Professional Lifeguard Certification 2021 - 2022

Escuela de Guardavidas de la ciudad de Azul.
Azul, Provincia de Buenos Aires.

WORK EXPERIENCE

Club Atlético Estudiantes - Olavarría Dic 2022 - Mar 2026 (Summer seasons)

Lifeguard

- Critical Decision-Making:** Assessed risks and executed rapid responses under high-pressure emergency situations.
- Teamwork & Crisis Management:** Coordinated with multidisciplinary teams to ensure public safety and operational emergency protocols.

TECHNICAL PROJECTS

Geolocation API | Go, Neo4j, Redis, Docker

- Routing API for computing and comparing real routes and distances across a city using graph algorithms and efficient data modeling.

Compiler | Java, YACC

- A Java-based compiler implementing lexical, syntactic and semantic analysis with intermediate code generation and structured error handling.

Complete portfolio with source code and additional technical projects:
